Ynte Jan Kuindersma
Excel VBA Developer

Haren, Netherlands

I am longtime developer of MS Office applications with VBA and database-driven websites with ASP.NET.

My goal is not programming in itself, but making people and organizations more efficient in their daily work by means of some clever code.

Besides programming I am an enthusiastic teacher and speaker at developer conferences.

People around me find me a lively, pleasant person to deal with. I am very patient and loyal. And very persistent in finding the best way to find a solution for a given problem.

Skills

Focus areas
